

NUFFIC TRAINING PROJECT

The Dutch Organisation for the Internationalisation in Education (Nuffic) has facilitated three skills development and management training interventions at Form Ghana.

Nuffic is an independent, non-profit organisation based in The Hague, the Netherlands. In 2016, 2017, and 2019, Form Ghana received funds for staff and community training programmes and other stakeholders.

The company contracted trainers from Van Hall Larenstein University of Applied Sciences, Form International, CMO and independent experts to deliver training on:

- Silviculture
- Advanced fire management
- Community fire management
- Commercial reforestation
- Stakeholder engagement and consultation
- Value-chain management
- Sustainable soil management.

The trainees were Form Ghana's management and supervisory staff, officials from the Forestry Commission, technicians at the University of Energy & Natural Resources in Sunyani, and community fire squad leaders. Other forestry companies were invited to participate, and staff from Miro Forestry, Newmont Golden Ridge, and 2iis Plantation attended.
